

AkmasVision

- The Enterprise AI Operating System
- • Search • Ask • Do
- • Visual orchestration with enterprise governance
- • Production-ready AI workflows in minutes

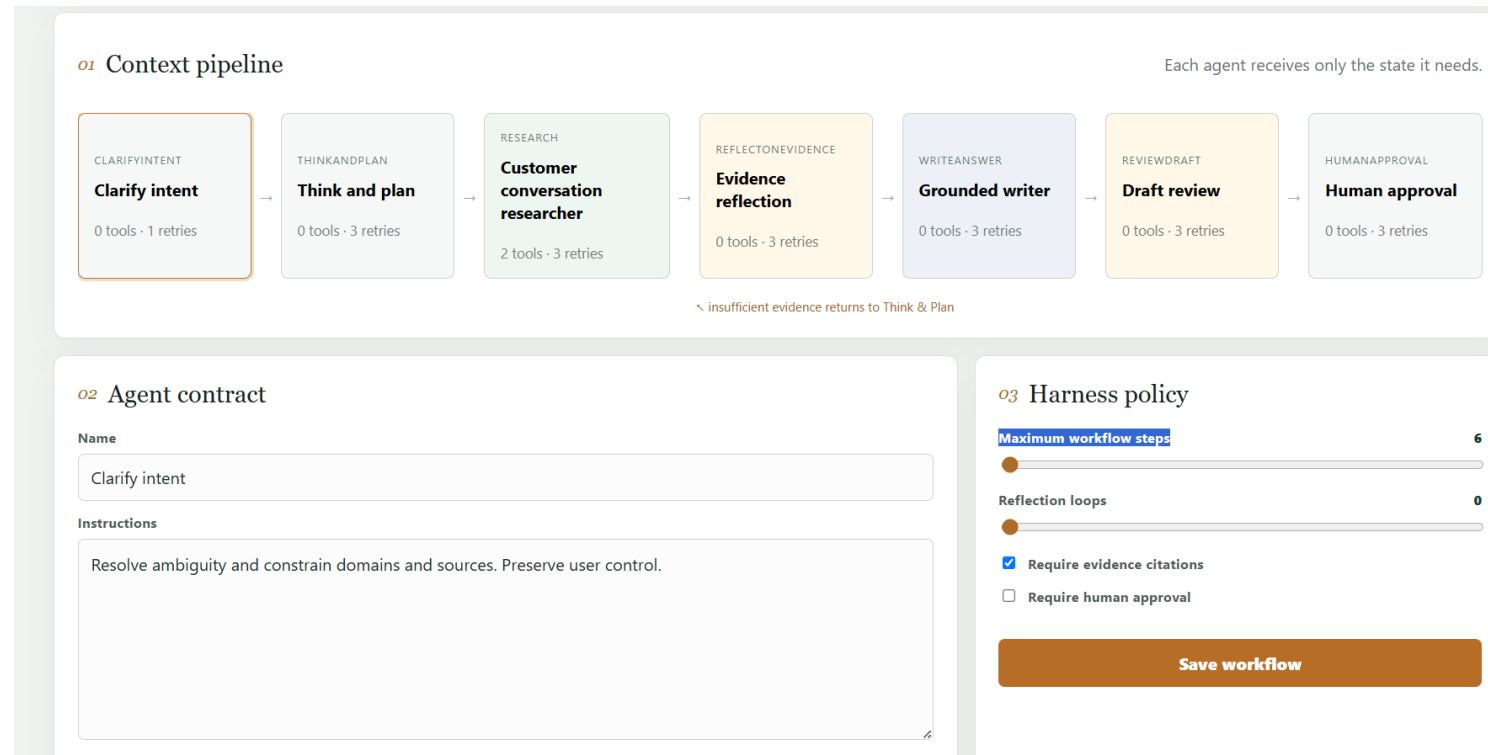

The Problem

- Enterprise AI today requires stitching together workflow tools, OCR, RAG, APIs, SQL, and messaging.
- • Slow delivery and expensive maintenance.
- • Security and governance become difficult across disconnected tools.

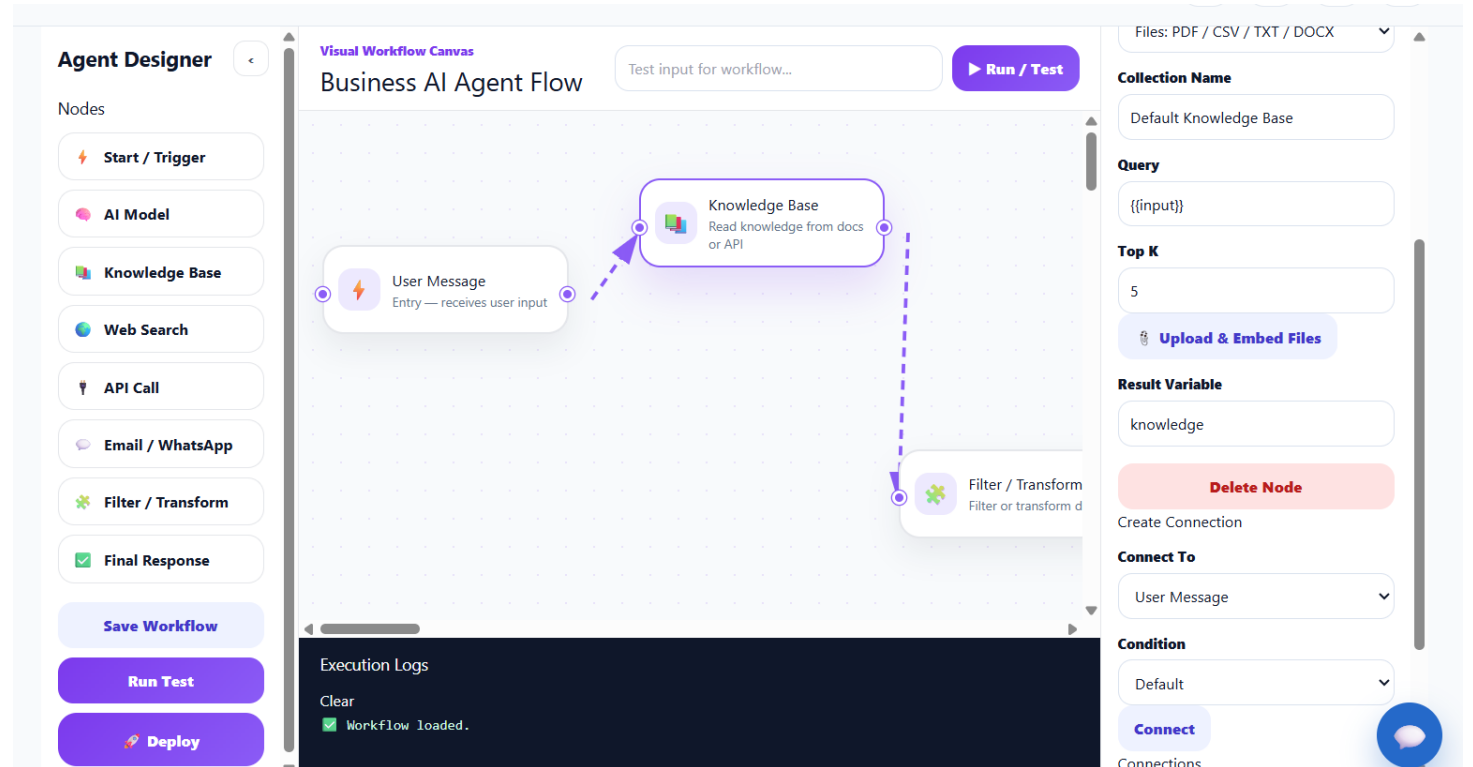

Search • Ask • Do Architecture

Configurable workflow engine with checkpoints, policies, permissions and human approval.

Live Product

- • Visual drag-and-drop workflow builder
- • Native Knowledge Base, Web Search, API, OCR and Messaging nodes
- • Deploy enterprise AI workflows without writing orchestration code

Why AkmasVision

- Unified platform instead of disconnected AI tools
- • Enterprise governance built-in
- • Search + Ask + Do architecture
- • Multilingual (English & Arabic)

Traction

- Live production platform
- • 10 active organizations/users
- • Real enterprise workflows running

Market Opportunity

- Healthcare
 - • Government
 - • Financial Services
 - • Manufacturing
 - • Mid-market & Enterprise

Business Model

- SaaS subscriptions
- • Usage-based workflow execution
- • Enterprise licensing

Team

- Enterprise software architecture
- • Software development expertise
- • Data science engineering

Fundraising

- Raising \$100K Pre-Seed via SAFE (\$800K cap)
- • 60% Product
- • 30% Growth
- • 10% Operations
