

SEED INVESTMENT OPPORTUNITY

The Remembrance Chamber

Whole-System Coherence Technology for Human Healing

Prototype Build-Out & Pilot Phase Financing

The Problem

Wellness today treats symptoms in isolation — never the whole system

Fragmented care

Spas treat the body. Therapy treats the mind. Retreats touch the spirit. No single modality addresses a person as one coherent system.

Chronic incoherence

Stress, disconnection, and burnout show up simultaneously across biological, psychological, social, and spiritual layers — but are rarely treated together.

Passive, single-sense tools

Meditation apps, sound baths, and float tanks each isolate one modality, diluting the depth and speed of the healing response.

The Solution

A hybrid physical + digital chamber that brings all six dimensions of the human system into coherence — at once.

- **Simultaneous, multi-modal delivery**

Eight synchronized therapeutic modalities delivered together or in guided sequence within a single session.

- **Whole-system framework**

Purpose-built around six aspects of the human experience — not a single wellness vertical.

- **Physical + digital architecture**

A physical chamber environment paired with an AI-guided digital layer that personalizes and sequences each session.

The Coherence Framework

Six aspects of the human experience, addressed together in every session

Astro

Cosmic & rhythmic alignment

Bio

Physical & physiological state

Psycho

Cognitive & mental patterning

Social

Relational & community connection

Spiritual

Meaning, purpose & transcendence

Soul

Core identity & inner essence

The Technology

Eight synchronized modalities — delivered simultaneously or in a guided sequential session

Resonant Frequency

Kaleidoscope Visuals

Halotherapy

Color Therapy

13.1 Surround Soundscapes

Crystal Therapy

Sensory Deprivation

Vibrational Therapy

How a Session Works

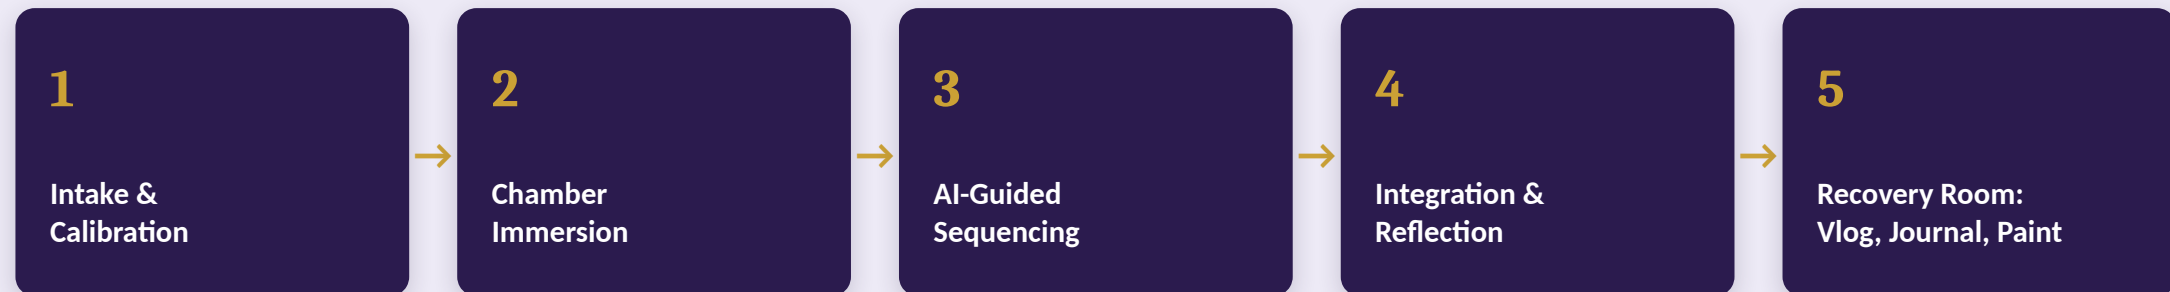

Every guest journey is calibrated to the individual — delivered in one of two formats

Simultaneous Immersion

All eight modalities are layered together in a single enveloping session for rapid, full-spectrum coherence.

Sequential Journey

Modalities are delivered in a guided sequence, building progressively across the six aspects of experience.

Session length, sequencing, and intensity are personalized per guest via the digital coherence layer. A dedicated recovery room lets guests process the experience through video journaling and creative expression before re-entering their day.

Market Opportunity

The chamber sits at the intersection of three fast-growing wellness categories

\$6.8T

Global wellness economy (2025), forecast to reach \$9.8T by 2029

GLOBAL WELLNESS INSTITUTE

\$20.5B

Mind-body wellness market by 2030, up from \$6.8B in 2021

INDUSTRY MARKET RESEARCH

\$9.1B

Global spa industry by 2028, the chamber's core B2B channel

INDUSTRY MARKET RESEARCH

Positioning: The Remembrance Chamber is a premium wellness-technology category creator — not a competitor within any single existing vertical.

Go-to-Market

Two complementary channels bring the chamber to guests

B2C — Direct Booking

Guests book chamber sessions directly at flagship and pilot locations, building brand and generating early revenue and testimonials.

B2B2C — Clinics & Practitioners

Licensed placement within wellness clinics and practitioner networks, embedding the chamber into existing care relationships and recurring guest flow.

Early pilot revenue from B2C bookings validates demand and unit economics ahead of a scaled B2B2C licensing rollout.

The Pilot Program

A single flagship chamber to prove the model before scaling

PHASE 1

Prototype Build

Engineer and construct the first physical chamber, integrating all eight modalities with the digital coherence layer.

PHASE 2

Site Selection & Install

Identify and secure a pilot site — a partner wellness center, spa, or clinic — and install the chamber.

PHASE 3

Guest Pilot & Data Capture

Run guided sessions with early guests, capturing outcome, satisfaction, and coherence data to validate the model.

PHASE 4

Iterate & Prepare to Scale

Refine the protocol and unit economics using pilot data, preparing a template for additional locations.

Where We Are Today

Concept and design phase, complete — ready to move into prototype build

The chamber's design, modality selection, and coherence framework are fully specified. Seed capital funds the transition from concept renderings to a working, guest-ready prototype.

The Ask

Seed capital to fund prototype construction and a single-site guest pilot

SEED ROUND

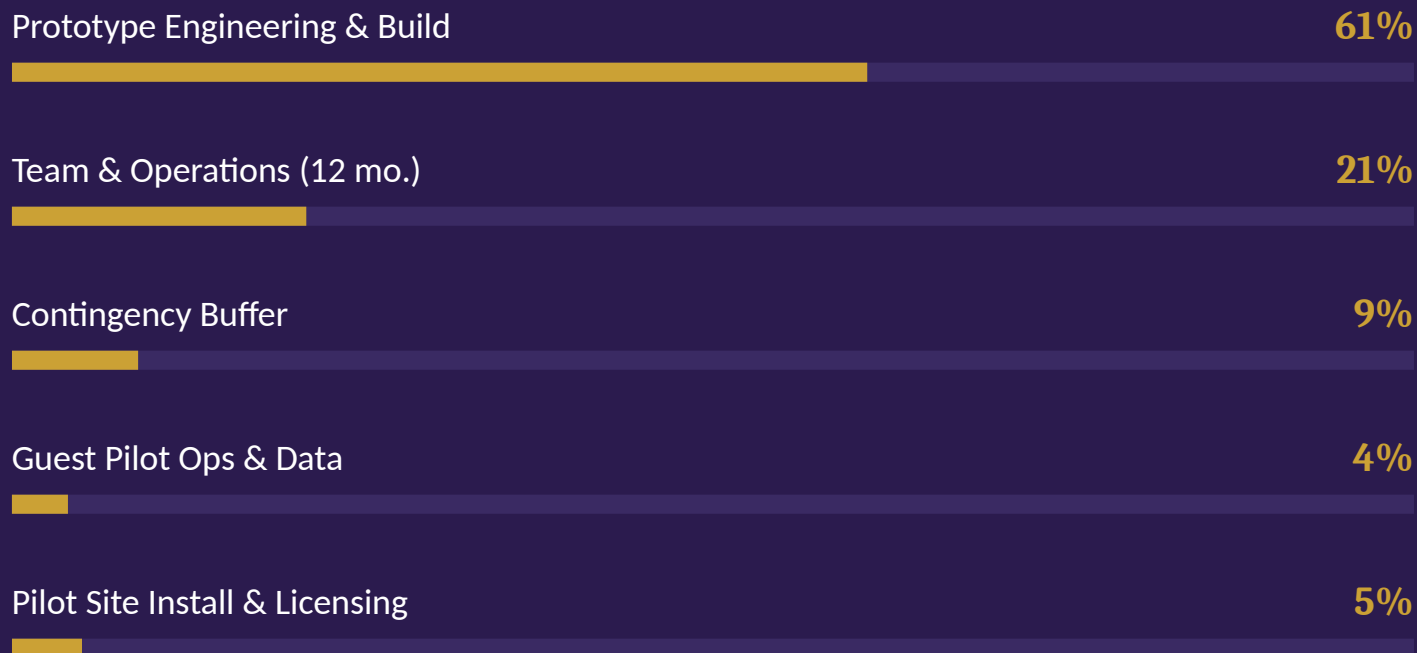

\$925K

12-month runway to a fully built prototype (chamber + recovery room) and completed guest pilot

Milestones Unlocked:

- Working chamber + recovery room
- Signed pilot site partner
- First guest cohort & outcome data

USE OF FUNDS

Estimates based on a spa-room-scale build; final figures pending vendor and contractor quotes.

Coherence is the foundation of healing.

Join us in building the first chamber designed for the whole human system.
