GROUP OVERVIEW | NAIROBI, KENYA | FOUNDED 2024

We build the businesses, skills and advice that help African producers and households earn more and weather shocks.

One group with three arms: an operating advisory practice, seven venture companies and a foundation in formation, all held to one standard of honest numbers and disciplined operations.

- Advisory operating since July 2024
- Seven ventures, USD 1.85M combined pre seed
- Founder led, operator built

November 2026

THE PROBLEM

In every sector we work in, producers hit the same three walls.

Artisans, farmers, waste collectors and health workers do valuable work. The system around them quietly loses most of that value before it reaches their pockets.

01

No quality signal

Good work goes unseen. Buyers far away cannot check quality, so they pay less or walk away.

02

No credit record

With no financial history, people cannot borrow for materials, seed, equipment or stock.

03

No route to market

Middlemen take most of the value, or there is simply no way to reach a buyer who pays more.

We build to close all three gaps together, because closing one on its own rarely holds.

HOW THE GROUP IS BUILT

One parent, three arms, each with its own job, its own accounts and its own rules.

Technophiles Advisory

OPERATING SINCE JULY 2024

Operator led advice on climate, supply chain, finance, export manufacturing and hiring.

Funds the group's first wave of work

Technophiles Ventures

PRE LAUNCH, PLANS AND DECKS READY

Seven companies, each built to stand alone with its own team, board and numbers.

USD 1.85M combined pre seed need

Fundi Africa Foundation

NONPROFIT IN FORMATION

A company limited by guarantee that will train producers and prove results with auditable data.

Seeking founding partners

Advisory clients are never steered to the ventures, and the Foundation is never a sales channel.

TECHNOPHILES VENTURES

Seven companies, one standard, each raised and run on its own numbers.

AgroEvolution	Circular farm inputs, farm data and a direct farm to buyer market for smallholders	**USD 200K**
Real Artisan	Export ready African craft through compliant materials, AI quality control and direct sales	**USD 200K**
EcoCircular	Waste data, a recycling marketplace and verified diversion credits for African cities	**USD 500K**
SheRise	Income, credit, learning and cover for women who run micro businesses	**USD 300K**
HealthConnect	AI triage, telemedicine and lifestyle medicine, with licensed clinicians leading	**USD 250K**
Fin Clean Tech	LPG distribution, improved cookstoves, solar lighting and clean water, paid over time	**USD 150K**
Prime Sustainable	Fair credit and micro insurance for people with no credit file, through licensed partners	**USD 250K**
Combined	**Raised one company at a time, each into its own standalone company**	**USD 1.85M**

HOW THE PIECES CONNECT

Separate companies that make each other stronger, without ever sharing customers or client information.

Clean energy with finance attached

Fin Clean Tech brings LPG, cookstoves and solar lighting. Prime Sustainable plans funding through licensed partners, and SheRise opens the enterprise opportunities to women.

Women's health where women gather

SheRise Health, a planned joint venture of SheRise and HealthConnect, brings clinical pathways to women through the groups, chamas and SACCOs they already trust.

Waste that feeds the soil

EcoCircular recovers organic and recyclable waste streams. AgroEvolution turns organic waste into insect protein feed, frass fertiliser and biostimulant.

Skills that travel anywhere

Fundi Africa Foundation will train artisans, smallholders, recovery workers and health workers to market standards. Graduates are free to sell anywhere.

Advice that pays for the start

Fee income from Technophiles Advisory funds the group's first wave of work before outside capital arrives.

One way of working

Quality systems, SOPs, honest reporting and written conflict rules apply in every arm and every company.

EXPORT MANUFACTURING

Made in Africa, sold to the world: four ventures make for export, and two help producers get there.

Real Artisan

Export craft production in shared hubs, with REACH and Prop 65 compliance built in.

AgroEvolution

Export grade aggregation, avocado oil and processed fruit, and circular farm inputs.

EcoCircular

Recycled materials processed to the specifications manufacturers pay for.

Fin Clean Tech

Local assembly of solar and water units, supplied into East African markets.

SheRise helps women led producers become export ready, and Prime Sustainable plans working capital for exporters through licensed lenders.

Duty free lanes: the US under AGOA, extended to 31 December 2028, and the EU under the EU Kenya Economic Partnership Agreement, in force since 1 July 2024.

WHY NOW

Policy, technology and buyer demand are lining up behind the markets we serve.

970M

people in Sub Saharan Africa lack clean cooking, and over 560 million lack electricity

58%

of adults in Sub Saharan Africa had an account in 2024, up from 49% in 2021, so about four in ten still have none

4 Nov 2024

Kenya's Extended Producer Responsibility Regulations took effect, requiring producers to fund take back and recycling

694,000 t

of avocado grown in Kenya in 2025, yet only about 121,000 tonnes exported

- ✓ Mobile money gives millions of people a transaction record that can support fair credit.
- ✓ Buyers and processors want steady, traceable supply, and shoppers pay for provenance they can verify.
- ✓ Low cost sensors, smartphones and AI make field data affordable for the first time.

EARLY SIGNAL

Advisory is earning today, and the ventures already have people waiting for them.

Since 2024
Technophiles Advisory serving clients, fixed fee against defined deliverables

350
artisans and artisan groups have registered interest in Real Artisan

210
farmers have registered interest in AgroEvolution

23
health professionals have registered interest in HealthConnect

- Real Artisan, AgroEvolution and the group parent are registered as private companies in Kenya.
- A working Real Artisan platform prototype and demo, with QR provenance for buyers, are already built.
- Seven venture plans and investor decks are ready, and the Foundation blueprint is complete.
- Hiring That Holds, a paid hiring workshop for entrepreneurs in Kenya, was delivered in 2026.

ⓘ The ventures are pre launch, with no revenue yet. Interest is reported as interest, never as customers or sales.

WHO IS LEADING THE GROUP

Every system here has been run before, at scale, by the person now building it.

USD 137M

approximately, in programmes and transactions structured since 2018 with the World Bank Group and UN agencies

1M+

pay as you go customers served across twelve countries in clean cooking

3,000

artisan hubs supporting over 15,000 artisan families, in a certified ethical supply chain

Under 1%

defect rate, down from 8%, under ISO 9001:2015, with on time delivery above 99%

Perminus Nyangena

Founder, Technophiles Conglomerate Africa

- Twenty years running operations across Africa, Asia and North America, with full profit and loss ownership.
- Former Global Director of Operations and Business Development in global artisan commerce, and Group Global Head of Manufacturing and Supply Chain in multinational clean energy manufacturing.
- Has led treasury and finance committees, and line managed senior country leads against business and financial growth objectives.
- Mentor Director of a mentors circle for women founders in Nigeria, Ghana and Tanzania.
- MSc Operations and Technology Management and BSc Applied Mathematics and Chemistry, University of Nairobi.

WHERE THE GROUP IS GOING

Advice is operating today, and the first venture pilots go live in Q1 2027 once funding is secured.

Today

- Advisory serving clients since July 2024
- Real Artisan and AgroEvolution registered
- Seven venture plans and decks ready
- Foundation blueprint complete

Q4 2026

- Register the remaining standalone companies
- Open pre seed conversations
- Launch preparedness for every venture
- Begin Foundation registration

Q1 2027

- First venture pilots live, once funding is secured
- First Foundation cohort, once funded

H2 2027

- Seed readiness for the leading ventures
- Next ventures launched on evidence

Everything after today is a plan, not a result.

HOW WE HOLD OURSELVES

Report what is true, including what has not happened yet.

WHAT THE GROUP BELIEVES

- Advice is only as good as the operations behind it.
- Every business should stand on its own numbers.
- Women belong in every role, at every level.
- Report what is true, including what has not happened yet.

CONFLICTS, STATED PLAINLY

- We declare group interests in writing in every advisory proposal.
- We decline mandates that touch the selection or funding of a competitor to a group venture.
- We separate: client information never passes to the venture arm.
- One set of numbers is used in every document the group publishes.

THE OPPORTUNITY

USD 1.85M across seven companies, raised one company at a time.

USD 1.85M

Combined pre seed need across seven standalone companies, with tickets from USD 150K to USD 500K.

WHAT THIS MAKES POSSIBLE

- Seven companies registered and ready to pilot
- Pilots in farming, craft, waste, energy, health and finance
- A Foundation that proves skills with real data
- Local field and distribution jobs as pilots grow

Invest in one company

Pre seed tickets from USD 150K to USD 500K, each into its own standalone company.

Fund the Foundation

Back the first pilot cohort and the outcome data it produces.

Engage the Advisory

Diagnostics, structuring, market entry and hiring mandates.

Join a founding team

Venture lead and technical cofounder roles across the seven companies.

This deck is a summary for prospective investors. It is not an offer of securities. Full information is shared with qualified investors on request.

BEYOND CAPITAL

Money matters, but these are what move the group forward first.

People

- Full time venture leads for each company
- Technical cofounders where product matters most
- Independent directors for the group and the Foundation

Partners

- Pilot counties and cooperatives
- Licensed lenders and insurers
- Foundations and development funders
- Climate focused pre seed investors

Setup

- Register each venture as its own company
- Group governance and conflict policies in writing
- One set of numbers used in every document

LET US TALK

Let's build businesses that help Africa's producers earn more, together.

Write, call or WhatsApp. We read every message and reply in writing.
