- **Other Languages:** Node.js, Python
- **DevOps and Tools:** Git, Linux, Nginx, Apache, Cloudflare, Server Management
- **Other:** On-Page SEO

Professional Experience

Technical Instructor and Independent Developer | Bikaner, India | Sep 2025 – Present

- Designed the database schema and user workflows for a loan recovery software platform.
- Built and run an independent online store, biteBasket, with Shiprocket integration for order shipping and tracking.
- Taught computer fundamentals and prepared lesson plans, improving my ability to explain technical concepts clearly.

Project Lead and Laravel Developer | Dunes Factory Pvt. Ltd. (Product-based) | May 2022 – Aug 2025

- Led a technical team in building large-scale Laravel applications, delivered on time with a focus on speed and reliability.
- Architected a multi-tenant Laravel system that let the team manage multiple websites from a single codebase.
- Developed secure REST APIs in Laravel to share data between web platforms, mobile apps and admin dashboards.
- Optimised MySQL database structure and queries so e-commerce websites load faster under heavy traffic.
- Improved search speed and accuracy in customer management (CRM) tools.
- Integrated payment gateways (Paytm, PayPal, Stripe and Razorpay) for secure checkout.
- Built internal tools to track design projects from first request to final delivery.
- Mentored and onboarded new developers on the Laravel codebase, coding standards and active projects.

Software Developer | Neologics Resources Pvt. Ltd. (Service-based) | Jan 2022 – Apr 2022

- Built a complete loan management application covering customer sign-up, approval workflow, EMI tracking and payment history.
- Created role-based dashboards so admins and customers see only the features and data meant for them.
- Integrated click-to-call functionality directly inside the application.
- Worked across the full stack: user interface, backend logic and database design.

Projects

Bank Lead Management System

- Built a platform for bank teams to track, assign and manage customer leads across branches.
- Developed backend APIs to create leads, update statuses and share data with external bank tools.
- Implemented role-based access so Bank Managers and Regional Managers see only their own reports and permissions.
- Added website visitor tracking to show the source of each lead and its path to conversion.
- Built reports on branch and team performance, covering the full lead journey from first contact to closed deal.

Loan Management Application

- Built an end-to-end system for customer onboarding, loan approval and monthly EMI tracking.
- Created separate views for each user role and added click-to-call inside the application.

biteBasket (Online Store) | Independent Project

- Built and manage an e-commerce store for food products, integrated with Shiprocket for shipping.

Loan Recovery Platform | Freelance

- Designed the database and user workflows for a loan recovery software platform.

Education

Master of Science in Computer Science | NSP College, MGSU, Bikaner | 2022

Bachelor of Commerce | NSP College, MGSU, Bikaner | 2020

Certifications

- RS-CIT (Rajasthan State Certificate of Information Technology) | 2018
