SUMMARY

Data Quality Analyst with experience in validating and maintaining large product and pricing datasets to ensure data accuracy and reliability. Skilled in SQL, Excel and BI tools such as Power BI and Tableau for data analysis and reporting. Experienced in data cleaning, anomaly detection, and improving data quality standards to support data-driven decision-making.

TECHNICAL SKILLS

- Programming: SQL (Joins, CTEs, Window Functions), Python (Pandas, NumPy)
- Data Tools & Processing: Excel, Google Sheets, Power Query, Data Cleaning & Validation
- Databases: MySQL
- Analytics & Reporting: Power BI (DAX, Dashboarding, KPI Reporting), Tableau, Exploratory Data Analysis
- Data Quality & Analysis: Data Validation, Data Cleaning, Data Integrity, Anomaly Detection, Quantitative Analysis

EXPERIENCE

Data Quality Analyst | Anakin (YC S21)
Jan 2026 - Present

- Perform large-scale product and pricing data validation across multiple e-commerce platforms, ensuring high data accuracy and consistency.
- Match and map competitor product data across multiple platforms to maintain reliable datasets.
- Identify and resolve data discrepancies, duplicates, and missing values, improving overall data quality standards.
- Use Advanced Excel(Pivot Tables, VLOOKUP, data cleaning techniques) to process and validate bulk datasets efficiently.
- Conduct data quality checks and audits to ensure consistency across internal and external data sources.
- Collaborate with cross-functional teams to improve data workflows and validation processes.
- Maintain structured datasets to support analytics, reporting, and business decision-making.

Data Science and Analytics Intern | Future Interns
Sep 2025 - Oct 2025

- Developed interactive dashboards in Power BI to track e-commerce and marketing KPIs.
- Cleaned and transformed 100K+ records using Power Query and DAX, ensuring high data accuracy.
- Performed data validation and preprocessing to prepare datasets for analysis and reporting.
- Conducted customer segmentation analysis, improving targeting efficiency and reporting.
- Worked with stakeholders to translate business requirements into data-driven insights.

Data Science Trainee | Introtallent Pvt Ltd
Sep 2023 - Mar 2024

- Built and automated analytical reports and dashboards to identify product and customer behavior trends.
- Performed data cleaning, preprocessing, and exploratory analysis on structured datasets.
- Improved reporting workflows by automating repetitive tasks, increasing efficiency by 25%.
- Supported predictive analytics projects to identify high-value customer segments.

EDUCATION

Sri Taralabalu Jagadguru Institute of Technology, Haveri — Aug 2019 - Aug 2023
Bachelor of Engineering, CGPA: 7.14/10
