Work Experience

Zomato – SDE Intern, Gurgaon

June 2025 – April 2026

Tech Stack: React.js, TypeScript, JavaScript, AWS, Grafana, Datadog, Redash

- Engineered frontend functionality for **One-Support**, Eternal's internal customer support platform used by agents across Zomato, Blinkit, District, Hyperpure and other businesses, supporting real-time operations at an approximately 100M+ user scale.
- Engineered and enhanced a reusable **UI Component Library** using Storybook, building components including inputs, modals, buttons, and design-system elements, packaged for distribution via NPM.
- Enhanced a complex **Chat SDK** implementing real-time messaging, message-state management, ticketing workflows, chatbots, workflow automation, attachments, API integrations, and event-driven flows.
- Implemented a **Call Support System** that lets agents call customers and drivers directly through Exotel, with AI-based chat summaries for agent context.
- Built Grafana and Datadog dashboards, analyzed data with Redash, and resolved production issues.

Simplium Technologies – Full Stack Developer Intern, Remote

Dec 2024 – April 2025

Tech Stack: React.js, Next.js, Appwrite, Python, MySQL

- Developed the frontend of a freelancing marketplace in React.js with reusable components and CRUD workflows; designed the database schema, wrote queries, and created **REST APIs** integrating with Appwrite.
- Architected a news aggregation platform in Next.js with **web scraping** pipelines for content ingestion, database management, dynamic content delivery, and SEO-optimized rendering.

Technologies

Languages: C++, Java, Python, JavaScript, TypeScript

Technologies and Frameworks: ReactJS, NodeJS, HTML, CSS, Tailwind CSS, Storybook, Jest, REST APIs

Databases and Cloud: MongoDB, MySQL, PostgreSQL, Firebase, AWS

Tools and Version Control: Git, Netlify, Vercel, Grafana, Datadog, Redash

Other: Data Structures & Algorithms

Projects

HealthSetu — Integrated Healthcare Management System

[Live Demo](#) | [GitHub](#)

Tech Stack: ReactJS, Tailwind, DaisyUI, NodeJS, MongoDB, JWT, Python

- Developed an AI-powered healthcare platform with role-based dashboards for patients, doctors, and admins, implementing intelligent queueing, inventory management, and healthcare workflows; implemented the backend **REST API** using Node.js/Express.js with JWT authentication and MongoDB.
- Integrated appointment booking, real-time **Fitbit health tracking**, prescription generation, and medication reminders, enabling personalized health monitoring and streamlined patient workflows.

Ivене 1.0 — AI-Powered Mock Interview

[Live Demo](#) | [GitHub](#)

Tech Stack: Next.js, TypeScript, Google Generative AI, Clerk, Drizzle ORM

- Created an AI-Powered Mock Interview Platform with Next.js and Google Generative AI, using real-time speech-to-text and webcam support to improve user performance, and optimized Drizzle ORM + PostgreSQL to handle **10K+ records**

Mini Projects & Contributions

- Delivered the official websites for GDSC DYPCOE [Live Demo](#) | CPMC DYPCOE [Live Demo](#) | Rotaract DYPCOE [Live Demo](#)
- Co-founded **Multi UI**, an open-source UI component library distributed as an NPM package [GitHub](#)

Education

D.Y. Patil College of Engineering, Pune, Maharashtra

June 2022 – July 2026

Bachelor of Engineering — CGPA: 9.51

Achievements & Certifications

- Smart India Hackathon 2024 Finalist**, Runner-Up, Top 5 in India
- Solved 450+ problems on LeetCode with a **1768 rating**; Global Rank 389 in Weekly Contest 444
- Best Paper Award**, International Conference on Cybertech and Smart Systems 2025
- Winner**, GDSC DYPCOE 2023 Website Building Competition
- Winner**, Avishkar Competition SPPU for 3 consecutive years
