Professional Summary

Salesforce Developer with hands-on experience in Lightning Web Components (LWC), Apex, Salesforce Flows, OmniStudio, Agentforce, Prompt Builder, and Gemini API integration. Skilled in developing enterprise Salesforce applications, workflow automation, and AI-powered solutions. AWS Certified AI Practitioner and holder of the Salesforce Agentblazer Champion and Agentblazer Innovator '26 badges.

Experience

PwC India

Feb 2026 – Aug 2026

Intern/Trainee

Pune, Maharashtra

- Developed reusable Lightning Web Components (LWC) for enterprise Salesforce applications.
- Built workflow-driven Salesforce solutions using OmniStudio including FlexCards, OmniScripts, Integration Procedures and DataRaptors.
- Contributed to AI-enabled Salesforce solutions using Prompt Builder, Agentforce and Gemini API integration.
- Created reusable email templates supporting notification-based workflows such as appointment booking confirmations.

Projects

Appointment Scheduling Solution | OmniStudio, LWC, Apex

- Developed an appointment scheduling solution enabling doctor selection, contact selection, slot booking and waiting list management.
- Implemented FlexCards, OmniScripts, Integration Procedures and DataRaptors to automate booking workflows.
- Designed reusable Lightning Web Components for booking and notification processes.

Expense Management Application | Lightning Web Components, Apex

- Built an LWC-based application for expense submission, approvals and status tracking.
- Developed reusable UI components to streamline expense management workflows.
- Implemented Apex controllers for backend processing and business logic.

AI Managed Services | Lightning Web Components, Prompt Builder, Apex

- Developed an AI-powered Salesforce solution using Prompt Builder and Gemini API to generate intelligent, context-aware responses.
- Implemented Apex services to enable seamless communication between Salesforce components and AI services.
- Configured Salesforce Admin features including Custom Objects, Validation Rules, Profiles, Permission Sets, and Salesforce Flows to support secure and automated business processes.
