Professional Summary

Backend-focused Full Stack Developer with **5 years of experience** building scalable enterprise applications across Fin-Tech, SolarTech, Analytics, and AI-powered products. Strong expertise in **Node.js, NestJS, TypeScript, React, PostgreSQL, Docker, Kubernetes, AWS, CI/CD**, and LLM integration using Amazon Bedrock and LangChain.

Technical Skills

Backend: Node.js, NestJS, Express.js, REST APIs, Microservices, Kafka

Frontend: React.js, TypeScript, JavaScript

Databases: PostgreSQL, MongoDB, SQL Server

Cloud/DevOps: AWS, Docker, Kubernetes, Jenkins, GitHub Actions, Nginx, PM2

AI: Amazon Bedrock, LangChain, LLM Integration, Prompt Engineering, JSON-driven AI UI Generation

Professional Experience

Senior Software Engineer I — GeekyAnts

Feb 2026 – Present

Client: TZero

- Delivered full-stack features for the TZero financial platform using Node.js, TypeScript, React, and REST APIs.
- Built secure backend integrations between frontend modules and enterprise services.
- Developed reusable React components to improve consistency and maintainability.
- Collaborated directly with client stakeholders, QA, and engineering teams in Agile sprints.
- Participated in code reviews, debugging, testing, and production release validation.

Full Stack Developer — VIKI.AI

Oct 2024 – Jan 2026

- Built the **Enerokart** solar e-commerce platform using NestJS and PostgreSQL.
- Developed the **Uttan** distributor network platform with onboarding, inventory, approvals, and RBAC.
- Built backend services for **BESS** and **VSL Tracer**, improving operational visibility and reliability.
- Managed Docker, Jenkins, AWS ECS, and EC2 deployments while supporting CI/CD automation.
- Built AI-assisted internal workflows using LLM integrations and received the **Star Performer Award**.

Software Developer — Saranyu Technologies

Mar 2023 – Sep 2024

Product: Saranyu Analytics

- Designed scalable Node.js and Express.js backend services for real-time analytics.
- Integrated backend APIs with Python-based ML pipelines.
- Built interactive dashboards for business users.
- Improved platform reliability through scalable backend architecture.
- Enhanced reporting workflows and product adoption through stakeholder collaboration.

Associate System Engineer — TCS

Oct 2021 – Mar 2023

Client: Ausiex (FinTech)

- Developed React single-page applications integrated with backend services.
- Contributed to internal financial software used by business teams.
- Supported production deployments with minimal operational disruption.
- Resolved 100+ technical issues within SLA.
- Maintained technical documentation and supported Agile delivery.

Education

B.E. in Computer Science

PES Institute of Technology and Management

2017 – 2021

Certifications

HackerRank JavaScript Certification

Awards

Star Performer Award – VIKI.AI
